

POWER-WEDGE® COG-BELT®

Belts that work as hard as you do.

Performance Driven. Performance Proven.

The Timken® EPDM Power-Wedge® Cog-Belt® is specially designed for optimum performance:

- Durable
- Oil and heat resistant
- Static conductive
- Resists hardening and glazing
- 60% broader operating temperature range
- Made in the USA
- Energy efficient
- Built to Chek Mate® belt tolerances for a matched set

POWER-WEDGE® COG-BELT®

The Power-Wedge® Cog-Belt® combines the advantages of narrow belt wedge design with raw edge performance for maximum operating efficiency in a compact drive package. The Timken® Power-Wedge Cog-Belt is now made of Ethylene Propylene Diene Monomer (EPDM), a synthetic rubber with outstanding properties.

Performance Driven. Performance Proven.

Our Power-Wedge® Cog-Belt® is designed for optimum performance. High horsepower ratings translate into greater design flexibility – reducing drive cost, space and weight. The narrow profile permits reduced drive widths and a smaller drive envelope.

Raw edge construction contributes to outstanding operating efficiency. More torque with little or no slippage. The result is savings – in time, in belt life and in energy costs.

The Power-Wedge Cog-Belt meets ARPM standards for static conductivity as well as oil and heat resistance.

The Power-Wedge Cog-Belt is available in 3VX, 5VX, and 8VX cross sections as well as metric sizes XPZ, XPA, XPB, and XPC. Where applicable, belts are dual branded with imperial and metric part numbers.

- 1 High-Modulus Cords**
Carries high horsepower loads with minimum stretch. Better belt stability. Fewer take-up adjustments.
- 2 Precision Molded Cogs**
Improves belt flex, reduces bending stress. Helps dissipate heat and requires less power. Improves flexibility for increased performance on small diameter pulleys.
- 3 EPDM**
EPDM offers superior flex and load carrying capacity. It resists belt cracking and won't stretch. EPDM has excellent flexibility at high and low temperatures.
- 4 Raw Edge Sidewalls**
Produces a higher coefficient of friction. Keeps a tighter grip on the pulley to reduce slippage. Improves performance and efficiency. Reduces vibration for extended component life.

Horsepower Rating Comparison

Power-Wedge Cog-Belt

Metric Power-Wedge Cog-Belt

Recommended Pulleys: Hi-Cap Wedge – QD, Taper Bushed, or MST (3V, 5V, 8V)

TIMKEN BELTS

Timken Belts is part of The Timken Company's growing portfolio of engineered bearings and power transmission products. A manufacturer of premium performance power transmission belts, Timken Belts' associates and products help keep industry in motion and the world more productive.
