

TIMKEN BELTS

SUPER  G-DRIVE[®]

Engineered for Power, Built for Harvest

Timken Belts offers a comprehensive line of high-performance Super Ag-Drive® belts designed for the tough conditions of agricultural applications.

As a leader in variable speed belt technology for harvesting machines, we manufacture replacement belts that withstand harsh environments, heavy loads, and continuous operation. Each Super Ag-Drive belt meets or exceeds original equipment specifications, ensuring maximum reliability and performance when it matters most.

Super Ag-Drive belts help feed the world by offering a product that is:

- Engineered for specific applications and optimum performance
- Designed and built to rigid specifications
- Rigorously tested in the lab and farmers' fields
- Manufactured in ISO 9001:2015 facilities
- Designed for durability and long life
- Constructed to the highest quality standards
- Built using the latest technology and materials

Timken Belts is a trusted leader in high-performance belt solutions for the agriculture industry. As farming equipment grows in size and power, the demands on belts increase. That's why Timken Belts engineers continually push the boundaries of innovation—developing advanced

Timken Belts offers a comprehensive line of Super Ag-Drive solutions, including classical, narrow wedge, round, double-angle, vee-rib, and banded belts. Designed for harvesting equipment used worldwide, these belts feature:

■ **Advanced Engineering**

Superior materials and manufacturing techniques ensure maximum efficiency and longevity.

■ **Enhanced Load Capacity**

Built to handle higher torque and heavier loads with ease.

■ **Extended Horsepower Range**

Optimized for powerful agricultural machinery, delivering consistent performance under extreme conditions.

belt designs that withstand the harshest conditions and the most demanding applications.

Agricultural belts must endure extreme environments, heavy loads, and continuous operation. Among the most challenging applications is the rotor/cylinder belt, which plays a critical role in crop threshing. Downtime during harvest season isn't

just inconvenient—it's costly. Farmers depend on Timken Super Ag-Drive belts for superior durability, reliability, and peak performance when it matters most.

When performance and reliability are non-negotiable, trust Timken Super Ag-Drive belts to keep your equipment running at its best—season after season.

TIMKEN BELTS

Timken® belts are part of The Timken Company's growing portfolio of engineered bearings and industrial motion products. Timken Belts manufactures premium-performance power transmission belts that help keep industry in motion and the world more productive.
